CalMox

Water Soluble Powder

Let's Care Animals!

COMPOSITION

Each 1000 gm contains:

Amoxicillin as Trihydrate

Clavulanic Acid as Potassium Clavulanate

Bromhexine HCl

160 mg

40 mg

5 mg

(As per innovator's Specifications)

INDICATIONS

- Calamox Powder is an ideal combination of Amoxicillin and Calvenic acid.
- Amoxicillin is a broad spectrum antibiotic cover a wide range of Gram + and Gram – bacteria. Including Streptococci, Staphylococci, Clostridia, E-coli, Salmonella and Pasteurella multocida.
- Amoxicillin works by interfering with the synthesis of peptidoglycan, a crucial component of bacterial cell wall. By inhibiting of the cell walls, weakens the structural integrity of bacteria, making them susceptible to the body immune defenses and eventually leading to the death of bacteria.
- Bacteria produce an enzyme beta-lactamase which work against the Amoxicillin, in the result the efficacy of the Amoxicillin reduce many times, results are compromised.
- Calvenic Acid present in the Calamox Powder is very important. Amoxicillin and Calvenic Acid have very strong synergetic properties. Amoxicillin make a bond with Calvenic Acid to form Amoxicilline-Calvenic acid.
- Calvenic acid inhibit the production of beta-lactamase enzyme by bacteria (Which reduce the amoxicillin activities) thus allow the Amoxicillin to work against bacteria at full efficacy.

DOSAGE & ADMINISTRATION

Prevention

1 gm per 4 liters of drinking water for 3-5 days.

Treatment

1 gm per 2 liters of drinking water for 3-5 days.

CAUTION

- Protect from light & moisture.
- After opening the jar. Immediately use the powder.
- Store below 25°C in a cool & dry place.
- This medicine should be used according to veterinary doctor advice.

MAXICOL

Solution

Let's Care Animals!

COMPOSITION

Each gram contains:

Thiamphenicol

250 mg

(As per innovator's Specifications)

Maxicol Solution Contains Thiamphenicol which is an antimicrobial formulation intended for the treatment of infectious diseases in cattle and poultry.

It is the methyl-sulfonyl analog of chloramphenicol and has a similar spectrum of activity, but is 2.5 to 5 times as potent. Its main advantage over chloramphenicol is that it has never been associated with aplastic anemia.

Maxicol Solution has some additional advantages such as the broad-based spectrum of activity, non-toxicity with cost-effectiveness when compared with other products.

INDICATIONS

- Respiratory and intestinal tract infections
- Chronic respiratory diseases
- Fowl Coryza
- Fowl cholera
- Rickettsiae spp, Chlamydia spp, Mycoplasma spp, Pasteurella spp, Salmonella spp, Ornithobacterium spp, Clostridium perfringens, E. coli spp, Haemophilus paragallinarum spp.

Nutritional Supplement

HEPAJETI SP

Potent Hepatic Stimulant

COMPOSITION

Each 100ml contains

Betaine glucouronate	3.750 g
diethanolamine glucouronate	1.000 g
Nicotinamide	0.200 g
Sorbitol	10.000 g
Ascorbic acid	1.000 g

INDICATIONS

- Endogenous and exogenous intoxication
- Acute and chronic liver diseases
- Hepatic insufficiency
- Food intoxication

THERAPEUTIC EFFECTS OF COMPONENTS

Betaine: lipotropic activity, detoxifier, a practically atoxic methyl donor.

Diethanolamine: Reduces cholesterol level in serum and hepatic lipids.

Nicotinamide: Acts in redox reactions of carbohydrates and lipids oxidation. and synthesis of fatty acids, synthesis and degradation of amino acids, steroids synthesis.

Ascorbic acid: Antistress, antioxidant, neutralizes, the free radicals generated during detoxification in liver.

ADMINISTRATION

Orally into the drinking water

DOSAGE

1ml / 2liter drinking water

VITA C SP hydrosoluble oral solution

COMPOSITION

Each 1ml contains
Vitamin C

100 mg

INDICATIONS

- Water soluble vitamin supplement that readily soluble in water and gives instant supply of vitamin C to the bird.
- Vita C SP given to bird in drinking water.
- Vita C SP contains Vitamin C which is well known "Anti stress factor".
- Vita C SP encounters stress due to high production, environmental discomfort, health and managerial stress.
- Heat stress leads to general distress, low feed intake, high FCR, carcass fat contents and decreased egg size.
- Vita C SP is vital in formation of bones and muscles.
- Vita C SP provides Vitamin C supplementation for proper bone formation and muscles development.
- Vitamin C deficiency leads to deformed bones irregular muscles growth, which affects the production performance of layer and broiler.
- Vita C SP provides ready to use Vitamin C to body.
- Vita C SP fulfills Vitamin C deficiency to avoid illness, stress on bird and improper growth of muscles and bones.

ADMINISTRATION

Poultry: 1 ml in 4 liters drinking water for 3-5 days.
Calves, Sheep, Goat: 1 ml/20 kg body weight for 3-5 days.
Cattle: 1 ml/40 kg body weight for 3-5 days.

PRECAUTIONS

Prepare fresh solution at least after 24 hrs.

IMPORTANT NOTE

Vita C SP is product that is not limited to be used in hot and humid environment. But it is needed throughout the year for maintenance of health, combat stress and essential in production from broiler and layers.
